Description:

the 1990s, the number of people who are employed in the service sector has increased in all countries. The increase is most pronounced in the United States, where the service sector has become the dominant sector of the economy. In the Netherlands, the service sector has also become the dominant sector, but the increase is less pronounced than in the United States.

The increase in the service sector is due to a number of factors. One of the main factors is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

Another factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A third factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A fourth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A fifth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A sixth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

A seventh factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

An eighth factor is the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector. This is due to a number of factors, including the increase in the number of people who are employed in the service sector.

Aeronautical Services Manager (ASM) reports to Manager Aeronautical Services & ATM (MASATM) and is part of a team in the Aeronautical Services Department of Flight Operations Support. This role is the point of contact for all external Industry and Air Traffic Control (ATC) agencies to ensure that Emirates strategy to fully optimise flight routings is achieved, including over flight permissions and optimum routes as applicable.

Job Responsibilities:

Direct the acquisition of the Airway Manual contents to ensure that both paper and

electronic information is available, accurate, and complete with regard to enroute, terminal arrival / departure routes, and airport information for all Emirates authorised airports.

Manage and control information received from aeronautical information publications (AIP), circulars (AIC), notice to airmen (NOTAM), charting and flight planning vendor data, and any other aeronautical source data (including crew reports) to ensure aeronautical services and flight crews are aware of and comply with latest valid information.

In coordination with Manager Flight Dispatch, ensure that company flight planning system database is maintained and the web briefing for crews provides the required functionality.

Constant review of functional enhancements is required

#### Job Requirements:

8 years min experience in Flight Operations environment, with a minimum of 3 years in a managerial position.

Experience in AIS, ATC, flight planning or flight dispatch, FMS Navigation database maintenance, EFB administration/management/maintenance, PBN development (including regulatory approval/ongoing validity requirements)
