Responsibilities

App Development: Design, develop, and maintain Android applications using Java or Kotlin, ensuring the highest quality and performance.

UI/UX Implementation: Collaborate with UI/UX designers to implement visually appealing and user-friendly interfaces.

Code Optimization: Write efficient and well-structured code, and continuously optimize the application for performance, responsiveness, and scalability.

Testing and Debugging: Identify and resolve issues and bugs through testing and debugging processes, ensuring the app works seamlessly on a variety of Android devices and versions.

API Integration: Work closely with backend developers to integrate RESTful APIs and web services into the app.

Version Control: Use version control systems like Git to manage and track changes in the

source code.
