We are seeking an experienced Android Developer with a strong focus on building robust shields for mobile applications. In this role, you will play a critical part in refining codebases in Java, Kotlin, and C, enhancing the security and overall quality of our mobile application shield. Your expertise in Android internals, hybrid application runtimes, and the ability to decipher Android kernel code will be crucial in ensuring the effectiveness of our shield's defense mechanisms. You will work closely with our security team to implement cutting-edge cybersecurity solutions and contribute to the continuous improvement of our shield's resilience.
