## Android Developer - Security Product

[Apply Now](#)

Company: Yinkozi, Ltd

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

We are seeking an experienced Android Developer with a strong focus on building robust shields for mobile applications. In this role, you will play a critical part in refining codebases in Java, Kotlin, and C, enhancing the security and overall quality of our mobile application shield. Your expertise in Android internals, hybrid application runtimes, and the ability to decipher Android kernel code will be crucial in ensuring the effectiveness of our shield's defense mechanisms. You will work closely with our security team to implement cutting-edge cybersecurity solutions and contribute to the continuous improvement of our shield's resilience.

### Requirements

Minimum 5 years of experience in mobile application development. Preference will be given to candidates with specific expertise in low-level Android development

In-depth knowledge of Android internals, hybrid application runtimes, and the ability to comprehend Android kernel code

Proficiency in developing mobile platform software using C and C++, emphasizing the development of robust shield functionalities

Experience in building, maintaining, and distributing SDKs for Android would be highly appreciated

Knowledge in mobile application attacks and defense techniques

## Benefits

Competitive salary and benefits package

Fully remote work option

Possibility of relocation to Dubai

Opportunity to work with cutting-edge security technology

Access to the latest security research and the chance to work on impactful projects

Room for professional growth and career development

Flexible work hours and a supportive work environment
