### Business Intelligence Manager Jobs In Dubai UAE | Amazon

[For More Top Organization Jobs Click Here](#)

We are seeking a creative, goal-oriented and highly technical person to join our Business Intelligence (BI) & Analytics team. At Amazon Payments Services (APS), we are focused on growing and developing Amazon's payment solutions, with the best possible payment experience for our customers and merchants.

**Responsibilities:**Work closely with multiple business teams to understand their challenges and provide data/analysis for better decision making. This will require data gathering and manipulation, synthesis and modeling, problem solving, and communication of insights and recommendations.

Lead and develop a team of data engineers, organize the Business Intelligence team's demands and priorities.

Learn and understand a broad range of Amazon's data resources and know how, when, and which to use.

Assist in the development of key metrics and performance indicators to measure overall performance and provide foundation for continuous improvement.

Build self-service reporting platforms, establishing automated processes for large scale data analysis.

Understand and write high quality queries to retrieve and analyze data (ongoing reporting and adhoc requests).

**Requirements:**8+ years of professional or military experience  
8+ years of SQL experience

Experience using Cloud Storage and Computing technologies such as AWS Redshift, S3, Hadoop, etc.

Experience with data visualization using Tableau, Quicksight, or similar tools#J-18808-Ljbfrr
