1- Business Transformation Consultant – Oil & Gas

Job: Full Time

Location: UAE

Description:

As a Consultant you will serve as a client-facing practitioner who sells, leads and implements expert services utilizing the breadth of IBM's offerings and technologies. A successful Consultant is regarded by clients as a trusted business advisor who collaborates to provide innovative solutions used to solve the most challenging business problems.

Job Responsibilities:

Identify business drivers and goals and develop compelling proposals and value-driven business cases to achieve desired business outcomes

Translate client's business needs into business requirements and participate in the production of detailed design and technical specifications.

Participate as part of our Energy & Resources team which provides crucial support and assistance to our Oil & Gas clients. Provide specialized consulting services within manufacturing and Asset Management.

Provide operations analysis and consulting services including solutions design, implementation, technical delivery, and advisory faculties to assist our chemical processing and manufacturing clients in optimizing their processes and supply chain management through application of advanced technology.

Job Requirements:

Solid background working in a Senior Business Consultant capacity.

Experience of manufacturing data within an Enterprise tech environment.

Knowledge of the Oil & Gas domain and manufacturing SME.

Key experience and exceptional ability of Asset Optimisation.

Strong understanding of Business Transformation.
