**Job Description**  
Pharmaron is a leading clinical research company, and we are currently looking for a Clinical Research Nurses to join our team on a part-time basis in Baltimore, Maryland. The Clinical Research Nurse participates throughout the entire clinical trials study process. As a Research Nurse, you are responsible for a variety of clinical research activities, ensuring that established protocols are followed, maintaining study protocol integrity, monitoring participant's status and safety, and playing a significant role in the training of clinical staff. Performs nursing specific tasks, as required by protocol, and towards the care and well-being of study participants. Confirms that unit is prepared for upcoming studies, including preparation of specimen collection, inventory of medical supplies, and required equipment. Explains protocol procedures to participants. Responsible for the Informed Consent process; from initial informed consent and throughout all phases of study discusses study details with the participant in accordance with ICH and FDA guidelines. Performs study-related tasks and procedures, such as investigational product administration, phlebotomy, urine collections, placement and maintenance of IV catheters, vital signs, ECGs, etc. Monitors and documents all participants' adverse events, medical conditions and responses to study medications and treatments. Quality controls source documents and other work regularly throughout each shift. Schedule: 12-hours shift (7am-7pm, 7pm-7am) - depends on Study schedule. RNs to be flexible to do Dayshifts and Nightshifts, this doesn't mean you will flip around constantly, but once a while you may need to work the shifts which is not your preferred shift. One weekend every 2 weeks. Qualifications: BSN degree required. MD State license required. 3 to 5 years of nursing experience in a hospital setting. 1 year of clinical

research experience is a plus
