We are looking for an analytical, knowledgeable aerospace engineer to assist our team as we develop designs, test and modify air and spacecraft/.

Responsibilities:Using mathematics, scientific, and engineering principles to design, repair, and improve air and spacecraft, component parts, facilities, materials, safety regulations, and manufacturing processes.

Researching and analyzing information to develop designs and solve problems.

Testing aircraft, rockets, and spacecraft to find and correct potential problems and to ensure compliance with quality, safety, and functionality requirements.

Designing and assembling control panels, propulsion systems, guiding systems, computer systems, and other necessary parts and systems.

Reviewing, developing, and improving production methods, facilities, and safety regulations.

Coordinating activities with production, research, testing, and other departments to optimize safety and efficiency.

Developing safety and quality standards, budgets, and timelines and ensuring projects comply with these regulations.

Writing design proposals, reports, manuals, and other technical documents.

Assisting with special projects or providing technical advice.

Staying current on industry developments, technology, materials, trends, and

regulations.Requirements:Bachelor's degree in engineering for entry-level positions, Master's

degree preferred for advancement or work in research or education.

Professional Engineer license may be desired.

Some positions may require a security clearance.

Experience is a major plus.

Strong understanding of materials, mathematics, science, thermodynamics, mechanics, robotics, aerodynamics, production methods, and potential safety and functionality problems and solutions.#J-18808-Ljbfrr
