Description:

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This includes not only sales and purchases but also expenses, income, and any other financial activities. The document also highlights the need for regular reconciliation to identify any discrepancies between the recorded amounts and the actual bank statements or receipts.

Next, the document outlines the various methods used for recording transactions. It covers the traditional double-entry system, where every transaction is recorded in two accounts, and the modern computerized systems that use spreadsheets and specialized accounting software. It also discusses the importance of using consistent accounting principles and standards to ensure that the records are comparable and reliable over time.

The document then moves on to discuss the role of internal controls in maintaining accurate records. It explains how internal controls, such as segregation of duties, authorization requirements, and regular audits, help to prevent errors and fraud. It also emphasizes the importance of having a clear and documented process for recording transactions, including the use of standardized forms and codes.

Finally, the document discusses the importance of maintaining accurate records for legal and tax purposes. It explains that accurate records are essential for calculating income tax, preparing financial statements, and providing evidence in the event of an audit or legal dispute. It also notes that many businesses are required by law to maintain certain types of records for a specific period of time.

IFS is a billion-dollar revenue company with 5000+ employees on all continents. We deliver award-winning enterprise software solutions through the use of embedded digital innovation and a single cloud-based platform to help businesses be their best when it really matters—at the Moment of Service™.

Responsibilities:

Guiding our customers to improve their business through a deep understanding of the core IFS solution and industry accelerators.

Understanding the customer's business, industry and local field service management drivers,

practices and policies.

Acting as a trusted advisor in articulating and critically evaluating customer-specific business solutions.

Seeking opportunities to increase customer satisfaction and deepen customer relationships.

Understanding customer business needs and guiding them in the most effective usage of IFS Products.

Leading and owning the solution definition and scope for the Service Management portion of the IFS Solution.

Identifying and bridging the gap between the customer's business requirements and IFS Products.

Conducting customer training sessions and workshops.

Guiding and assisting the customer with testing and Go Live cut-over strategies.

Keeping up to date with regulatory and compliance requirements of the Service Management domain in the key focus industries.

Managing, coaching and mentoring IFS colleagues.

Contributing to the continuous improvement of existing IFS products, processes and methodology.
