Description:

We are looking for a Psychiatrist to diagnose and treat mental illnesses.

Responsibilities

Review patients' medical history and collect additional information from family members and psychologists as needed

Evaluate patients' emotional, behavioral and mental state through discussion, observation and analysis

Identify mental disorders and determine best treatments

Develop therapy plans

Prescribe medications

Analyze medical tests and track patients' progress

Coordinate with healthcare professionals when hospitalization is required

Advise patients on how to cope with mental diseases and emotional breakdowns

Support patients' loved ones and inform them about the patient's condition

Research medical issues and new medical treatments to update your knowledge on mental healthcare.

Requirements

Work experience as a Psychiatrist

In-depth knowledge of various psychotherapeutic methods

Excellent communication skills with the ability to explain medical terms and conditions to a non-medical audience

Strong observation skills to accurately evaluate patients' demeanor and identify symptoms
