

United Arab Emirates Jobs Expertini®

Data Analyst / Data Scientist

[Apply Now](#)

Company: Nybl

Location: united arab emirates

Category: other-general

nybl is looking for our next generation of data scientists. We pride ourselves on growing our team and are always looking for the brightest talent to join us. Attitude is the most important trait we are looking for above all else. You will be working on transforming data into intelligence by developing innovative Artificial Intelligence (AI) solutions and integrating them with cutting-edge Internet of Things (IoT) technologies. Candidates must prove that they have the will, determination and ambition to be part of a team that's going to be the next Camel of the Middle East.

responsibilitieswork closely with nybl to identify issues and use data to propose solutions for effective decision makingbuild algorithms and design experiments to merge, manage, interrogate and extract data to supply tailored reports to colleagues, customers or the wider organisationuse machine learning tools and statistical techniques to produce solutions to problemstest data mining models to select the most appropriate ones for use on a projectmaintain clear and coherent communication, both verbal and written, to understand data needs and report resultsclear reports that tell compelling stories about how customers or clients work with the businessassess the effectiveness of data sources and data-gathering techniques and improve data collection methodshorizon scan to stay up to date with the latest technology, techniques and methodsconduct research from which you'll develop prototypes and proof of conceptsstay curious and enthusiastic about using algorithms to solve problems and enthuse others to see the benefit of your work.

required skills, abilities, education, and experienceExperience and knowledge in statistical and data mining techniques using (e.g., python, R, SQL)Experience and knowledge in applying advance Machine Learning techniques (e.g., Neural networks, supervised and unsupervised ML,

computer vision and image processing, text analysis) Experience and knowledge in big data analysis and management and distributed computing tools (e.g., Hadoop, Hive, Spark) Experience and knowledge in one or more programming languages (C, C#, Java) Experience and knowledge in web development frameworks (javascript, React, node.js). Experience analyzing data from 3rd party providers: (e.g., Google Analytics, Site Catalyst, Facebook Insights) Experience visualizing/presenting data for stakeholders using: Periscope, Business Objects, D3, ggplot, etc. Experience working with and creating data architectures. Knowledge of a variety of machine learning techniques (clustering, decision tree learning, artificial neural networks, etc.) and their real-world advantages/drawbacks. Knowledge of advanced statistical techniques and concepts (regression, properties of distributions, statistical tests and proper usage, etc.) and experience with applications. Excellent written and verbal communication skills for coordinating across teams. A drive to learn and master new technologies and techniques. Willingness to learn new technology. Able to work independently on researching solutions and applying findings. KSA Nationals are preferred for KSA based roles - if you are outside of KSA, please apply through our remote job listings.
