Data Analyst Job in Dubai Careem

Description:

We're well placed to solve complex and meaningful challenges at scale, with deep tech expertise, strong regulatory relationships, a local presence, and increasingly specialised global teams which are structured to operate as autonomous start-ups. Our team of over 400 engineers and developers are empowered to develop cutting-edge technology every day.

Job Responsibilities: Act as the first point of contact to provide concrete data-driven insights to answer business questions for your squad

Create compelling presentations and dashboards which tell a story by leveraging our data, engineering best practices and various reporting tools at Careem

Always push the envelope through continuous improvement of insights we generate, presentations we make and our reporting solutions

Act as an inspiring role model and mentor for the junior DA in your allocated squad. Give insightful and actionable feedback for their improvement / career development

Develop trust based relationships with your stakeholders. Co-create the product and commercial roadmaps for your squad by working very closely within your squad

Gain subject matter expertise and help define appropriate key metrics for the business unit and discover untapped areas for growing the business for your assigned squad

Experimentation launch / analysis – you will design A / B tests, F-Tests etc. and analyse

the data once it is available. You will need to identify the right test to use, right sample sizes which

will be needed for a conclusive answer

Develop deep understanding and familiarity of our data tech stack – DWH tables, data structures etc. You will also work very closely with DWH + Data Engineering team to partner on projects relating to ETL pipelines, data accuracy and building trust in our data

You will need to leverage knowledge of advanced statistics and machine learning to solve business problems relating to CLTV improvement, customer / captain segmentation, reducing customer / partner churn etc.

Job Requirements:6+ years of demonstrated experience working in an analytical role

4+ years of demonstrated experience with business intelligence and visualization tools creating management dashboards

Strong experience in leading cross-functional teams and projects from a technical and data analysis perspective

Expert at writing SQL queries against large amounts of data, strong analytical skills and a passion to work on problems that involve large datasets

Self-starter with excellent communication and organizational skills

Ability to get hands-on in a complex operational environment

Must be process orientated and a logical thinker with good attention to detail

Working knowledge with reporting tools such as Tableau, MicroStrategy or Looker

Working knowledge in Python, R, Spark, Hive

Experience ETL (Extract Transform Load) is a plus

Experience working with dimensional data, data lakes is a plus#J-18808-Ljbffr
