Data Analyst Manager Jobs in Dubai | Binance Careers For More Top Organization Jobs Click Here
Job Responsibilities: Leading through example: Overseeing high performing, multidisciplinary members of the Data & Analytics team, you will design and build complex visualisations and analytical models to understand the impact of various market or operational changes to our business

You will work closely with the operational and functional areas to identify, prioritise and deliver on their most pressing and impactful analytical use case; turning complex findings into simple visualisations and recommendations for execution

Analyze and interpret large (PB-scale) volumes of transactional, operational and customer data using proprietary and open source data tools, platforms and analytical tool kits

Be part of a fast-paced industry and organisation where time to market is critical

Requirements: A degree in a quantitative discipline, as Mathematics, Statistics, Actuarial Sciences, Computer Science, Engineering or Life Sciences

Minimum 8 years of industry experience applying advanced analytics

Demonstrated experience in the application of analytical techniques to guide operational improvements, scheduling, asset utilisation or investment decisions; and of supervising the work of others, preferably analytics or engineering roles #J-18808-Ljbffr
