Data Center Facility Engineer | Amazon Abu Dhabi

Amazon is guided by four principles: customer obsession rather than competitor focus, passion for invention, commitment to operational excellence, and long-term thinking. We are driven by the excitement of building technologies, inventing products, and providing services that change lives. We embrace new ways of doing things, make decisions quickly, and are not afraid to fail. We have the scope and capabilities of a large company, and the spirit and heart of a small one.

Amazon is now reinventing on behalf of the business customer and focusing on building the largest and most innovative Business-to-Business (B2B) marketplace in the world, and we are recruiting to make this vision a reality. Amazon Business is Amazon's response to tackle this incredible opportunity to address a vast new market segment and customer base. We are focused on building solutions that enables the B2B customer to find, research, and buy products and services from a vast selection, across multiple devices, marketplaces and regions. Our customers include individual professionals, small businesses to large institutions (and everything in between). Our B2B customers have different needs than the traditional Amazon customer so we are reinventing everything from how we display our selection, price our products, and provide the right customer experience.

Data Center Facility Engineer | Amazon Abu Dhabi | [Apply Now](#)
