Description:

Kitopi is the world's leading tech-powered multi-brand restaurant. With a mission to satisfy the world's appetite, Kitopi operates a portfolio of both invested and franchised F&B brands, serving as enablers in the food market by helping brands to grow and scale, both in the delivery and dine-in space. Launched in Dubai, UAE in January 2018, Kitopi has grown to become one of the greatest success stories in the cloud kitchen and food tech space. In July 2021, Kitopi announced its \$415 million Series C funding round, led by the world's largest technology-focused investment fund, Softbank Group Corp's Vision Fund 2. This investment catapulted Kitopi to the prestigious Unicorn status, making it the fastest Unicorn to have emerged from the MENA region.

Responsibilities:

Own the data modeling standards and data models that make up our data warehouse.

Lead the highly iterative dimensional modeling process.

Develop a comprehensive understanding of our products and operations, and become intimately familiar with the source data and its generating systems, using a combination of documentation, direct interaction with engineering teams, and systematic data profiling.

Collaborate with the data, product, and business teams to gather and distill their reporting and analysis requirements, and work together to design effective data models that accurately

represent the underlying business processes

Establish data modeling and naming standards that promote consistency and best practices across the data warehouse and communicate these standards effectively to the broader data team.

Define and maintain a high-level data warehouse architecture, including fact, dimension, and aggregation layers, and the relationships between them, in order to ensure a cohesive and effective data model.

Requirements:

At Kitopi, we value alignment with our mission and principles. The successful candidate will share these values and work in accordance with them

A Bachelor's or Master's degree in Engineering, Computer Science, Technology, or similar is required.

10+ years of experience working in data, with experience spanning multiple data disciplines, including data science, data engineering, data analysis, and data warehousing.

5+ years of experience in data modeling at a high-growth consumer product company or similar.

Should be keen on gaining a deep understanding of our business, product, and operations.

You should have a piercing eye for important business questions that the data models would be able to answer.

A drive for consistency, a mind for abstraction, and attention to detail are necessary traits for this role
