Description:

Summary A career in our Disputes and Claims practice, within Disputes and Claims services, will provide you with the opportunity to help our clients understand where they might have vulnerabilities and develop solutions to manage the risks involved. We prevent, respond to and remediate a wide range of business threats, risks and complex issues.

Responsibilities:

PwC Associates in the Digital Forensics & eDiscovery team have experience of helping clients in crisis. We apply cutting edge techniques to solve complex problems and apply smart data-driven solutions to our client's issues. A part of our team, you could be detecting fraud, insider trading or employee misconduct, or working alongside lawyers on litigations and regulatory matters.

We are ready to respond to crisis events all over the world. We specialise in forensically capturing and understanding huge volumes of unstructured data such as emails, Office documents and instant chat messages which can be collected from computers, servers, the cloud and smartphones or tablets.

Answering questions like Who spoke to whom How well did these people know each other?

What did a person know and when

You will work on multiple concurrent and high profile projects and work alongside recognised industry specialists in computer forensics, data analytics, information management, electronic discovery, and disclosure.

You will take responsibility for delivering discrete parts of an engagement, and coach junior team members on eDiscovery techniques and software, utilising your experience and applying best practice methodology.

Requirements:

Competent and have experience of at least one or more data collection tool, e.g. EnCase, FTK, and Nuix, and a document review platform e.g. Relativity, Recommind, Stratify, Clearwell and Ringtail.

Working experience of the eDiscovery process, including the skills to consult with clients on each stage of the EDRM life-cycle.

Strong logical reasoning, attention to detail and problem-solving skills.

Technically minded, with knowledge of PC functions (e.g. hardware components, networks) and software skills (e.g. various operating systems).

Knowledge and experience with data query and programming languages, such as SQL, C#, VBA and/or Python.
