

## Desktop Application Developer

[Apply Now](#)

Company: Instashop

Location: united arab emirates

Category: other-general

InstaShop: Shops you love delivered better Role overviewApplication BackDesktop

Application Developer POS - United Arab Emirates, AE - Full time - 916InstaShop,

headquartered in Dubai, is the leading online marketplace for supermarkets, pharmacies, pet

shops & other businesses in the Middle East. With a young & motivated team & an office

resembling the ones of startups in San Francisco, InstaShop is the right company for

individuals passionate about adding value within a fast-growing technology company. The

function of the Desktop Application Developer is to mainly design, develop and administer

desktop applications, although experience with developing web applications and back-end

APIs will be considered a necessary skill. You must be able to create front-end GUIs and

backend data services on a variety of platforms (mainly Windows and Mac) with

extensive knowledge in standard best practices for architecting solutions, including design

patterns. Primary Responsibilities: · Develop, maintain and extend our order management

software and other inhouse and customer facing apps · Work closely with product

and management teams to determine the technical requirements and the effort needed for

the development of our desktop application projects ·

Develop and administer desktop applications and consume APIs in accordance with project

requirements and department policies · Perform unit, integration and usability testing and

benchmarks for developed software ·

Evaluate emerging technologies and best practices, making recommendations that would

contribute to the efficiency and effectiveness of the development process for the whole team

Requirements: · 3+ years of experience with C# and Net Framework · Building modern and

responsive UI with WPF and XAML · Strong troubleshooting skills in live and business critical environments · Experience working with Visual Studio · Experience with relational databases (SqlServer, Sqlite, Mysql) · Be at ease with both front-end and back-end development · Enjoy working as a team member, as well as independently, and be willing to work for a challenging project in a fast-paced environment · Enthusiastic towards new technologies, writing clean and scalable code following best practices and paying attention to detail · Knowledge of the MEAN stack or AWS, will be considered a plus · Everything you need in just a few clicks!
