Description:

Our company is growing rapidly and is searching for experienced candidates for the position of sitecore developer. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities:

Partner with business teams and the other technical teams to scope projects and define high-level requirements

Drive solution architectures from ideation through release and support

Ensure solutions satisfy business requirements and are of the highest possible quality

Lead development teams in the definition of project implementation plans

Serve as the primary escalation point for any project technical issue or challenge

Identify and manage implementation risk

Collaborate with other developers to resolve technical challenges

Maintain a solid partnership with business and provide strategic technical leadership

Leads testing efforts by evaluating failed test cases and performing appropriate coding fixes, supporting coding changes resulting from user acceptance testing

Requirements:

Knowledge of relational databases, skills in SQL query design and development

Bachelor of Computer Science or Engineering

Sitecore certification a plus

Strong understanding and hands-on experience with Sitecore development

Experience using and implementing Sitecore tools such as (Sitecore Rocks, TDS, Unicorn, GlassMapper, Habitat, CastleWindsor)

Strong background on Reusable components and templates, Customization, Personalization, Sitecore search, Sitecore Workflows, Sitecore Commerce implementation, Sitecore Email Experience Manager, Sitecore xDB abd Experience Profile, and configuration of production grade Sitecore CD and CM instances
