Company: Canonical

Location: dubai

Category: other-general

Embedded & Desktop Linux Systems Engineer Jobs In Dubai | Canonical

About the job

Work across the full Linux stack from kernel through GUI to optimise Ubuntu, the world's most widely used Linux desktop and server, for the latest silicon. The role is a fast-paced, problem-solving role that's challenging yet very exciting. The right candidate must be resourceful, articulate, and able to deliver on a wide variety of solutions across PC and IoT technologies. Our teams partner with specialist engineers from major silicon companies to integrate next-generation features and performance enhancements for upcoming hardware.

Requirement

Experience with graphics stacks

Good understanding of networking – TCP/IP, DHCP, HTTP/REST

Basic understanding of security best practices in IoT or server environments

Good communication skills, ideally public speaking experience

IoT / Embedded experience – from board and SoC, BMCs, bootloaders and firmware to OS, through apps and services

Some experience with Docker/OCI containers/K8s

#J-18808-Ljbffr
