Company: Ultiwise Consult

Location: sharjah

Category: other-general

Designation: Engineering Manager Responding to: Projects Manager Company Overview: since its establishment in 1992. Our journey has seen us transform from a modest provider of desalination systems to a forwardthinking enterprise dedicated to delivering comprehensive watercentric services and innovative solutions. Position Overview: and managing the engineering team to ensure the successful design development and execution of innovative watertreatment solutions. This role demands a seasoned engineering professional with strong leadership skills a strategicmindset and a commitment to delivering highquality projects that align with our companys mission and objectives. Key Responsibilities: 1. Team Leadership: Lead mentor and manage a diverse engineering team fostering a collaborative and innovative workculture. Provide guidance and support to team members promoting professional growth and development. 2. Project Oversight: Oversee the planning execution and completion of engineering projects ensuring adherence to timelines budgets and quality standards. Collaborate with project managers architects and other stakeholders to achieve project objectives. 3. Technical Expertise: Provide technical leadership and guidance to the engineering team ensuring the application of bestpractices and innovative solutions. Stay abreast of industry trends emerging technologies and advancements in water treatment engineering. 4. CrossFunctional Collaboration: Collaborate closely with other departments including business development project management and operations to ensure seamless project execution. Facilitate effective communication and coordination between crossfunctional teams. 5. Resource Management: Optimize the allocation and utilization of engineering resources to meet project demands efficiently. 6. Quality Assurance: Implement and enforce

quality control measures to ensure engineering designs meet industry standards and client specifications. Conduct regular reviews and audits to monitor the quality of engineering deliverables.

7. Regulatory Compliance: The company has been a pioneering force in the United Arab Emirates. As an Engineering Manager at the company, you will play a pivotal role in leading. Ensure compliance with local and international engineering regulations standards and safety protocols. Collaborate with regulatory bodies to obtain necessary approvals and permits.

8. Continuous Improvement: Champion a culture of continuous improvement within the engineering team encouraging the adoption of new technologies and methodologies. Identify and implement process optimizations to enhance overall efficiency.

Qualifications: Bachelors degree in Engineering (Masters degree preferred). Professional engineering license is advantageous.

Experience: Accumulated 8-12 years of experience in engineering roles with a significant portion dedicated to managerial or leadership responsibilities. Demonstrated expertise in water treatment or related industries emphasizing hands-on experience in detailed design for projects such as Sewage Treatment Plants (STPs) Effluent Treatment Plants (ETPs) pumping stations Seawater Reverse Osmosis (SWRO)/Brackish Water Reverse Osmosis (BWRO) plants and Demineralization plants. Preferred experience in Oil & Gas projects providing an additional advantage. Proficient in the basic design of pretreatment equipment encompassing Multi Media Filters Ultra Filtration systems Self-Cleaning Filters and Cartridge Filters. Competent in the mechanical design of Reverse Osmosis systems. Skilled in hydraulic studies including pressure drop calculations and pump head calculations. Possess basic knowledge of Surge Analysis and Stress analysis. Experienced in piping design for water treatment plants and pumping stations. Capable of pipeline design for pressurized mains. Proficient in the design of metallic piping such as Stainless Steel (SS) Super Duplex Stainless Steel (SDSS) Carbon Steel (CS) Ductile Iron (DI) etc. Competent in the design of nonmetallic piping including Glass Reinforced Plastic (GRP) High Density Polyethylene (HDPE) Polyvinyl Chloride (PVC) etc. Skilled in developing material specifications for pumps valves piping etc.

Skills & Abilities: Strong leadership and people management skills. Excellent project management skills with a focus on delivering results. Technical proficiency in water treatment engineering. Effective communication and interpersonal skills. Problem-solving and decision-making abilities.

Personal Qualities: Visionary leader with a strategic mindset. Commitment to upholding the highest standards of ethics and integrity. Results-oriented with a focus on achieving tangible outcomes. Adaptable to changing

industry dynamics. Designation: Engineering Manager Responding to: Projects Manager
