Description:

Trilogy is a software conglomerate with a portfolio of over 110 products. As a fully remote company since inception, our 24/7 global finance team is able to operate without lag. The sheer number of products and customers means we generate plenty of data, so we need skilled data analysis to distill that data into actionable insights.

Responsibilities: Building financial dashboards and models that drive Trilogy's most important decisions

Publishing professional reports that will be used by the company's top executives

Analyzing data and generating insights that are focused on solving high-leverage business problems

Accounting, transactional finance tasks, or any typical FP&A work

Producing low-impact reports, dashboards, or models just because the data

exists Requirements: Expertise in QuickSight and NetSuite (not just basic proficiency)

Experience building financial dashboards and models for senior executives

At least 5 years of professional data modeling experience #J-18808-Ljbffr
