Location: abu dhabi

Category: other-general

Experience: 3 to 10 years Location: Abu Dhabi Bengaluru Gurgaon Pune Job code:

100762 Posted on: Oct 25 2023 Job Description: The FrontEnd Software will be responsible for

crafting visually appealing and userfriendly interfaces that deliver exceptional user

experiences on our digital platforms. Your expertise in frontend technologies and design

principles will play a vital role in shaping the look feel and functionality of our web

applications. Responsibilities: 1. Collaborate with UI/UX designers and backend developers to

implement responsive and interactive frontend solutions. 2. Develop and maintain user

interfaces using modern frontend technologies such as HTML5 CSS3 and JavaScript

frameworks (e.g. React Angular or Vue.js). 3. Ensure seamless integration of frontend

components with backend services through API calls and data manipulation. 4. Optimize web

applications for speed and performance focusing on efficient rendering and reducing load

times. 5. Conduct thorough testing of frontend components and user interactions to identify

and resolve defects and inconsistencies. 6. Ensure crossbrowser and crossplatform

compatibility to deliver a consistent experience to all users. 7. Collaborate with the product

team to understand user requirements and provide input on UI/UX design feasibility and

implementation. 8. Stay updated with the latest trends and best practices in frontend

development and implement them in our projects. 9. Participate in code reviews and provide

constructive feedback to team members to maintain code quality and consistency.

Requirements: 1. Bachelors or Masters degree in Computer Science Software Engineering

or a related field. 2. Proven experience as a FrontEnd Software Engineer with a strong portfolio

showcasing successful web application projects. 3. Proficiency in HTML CSS and JavaScript

and experience with popular frontend frameworks and libraries. 4. Understanding of responsive design principles and mobilefirst development practices. 5. Familiarity with frontend build tools such as Webpack or Gulp and package managers like npm or yarn. 6. Experience with version control systems such as Git and collaborative coding workflows. 7. Strong problemsolving skills and the ability to implement creative solutions to UI/UX challenges. 8. Excellent attention to detail and a passion for delivering visually appealing and intuitive user interfaces. 9. Effective communication and teamwork skills with the ability to work collaboratively in a fastpaced environment
