Frontend Engineer Jobs In Dubai | invygo

About the job

About Invygo Founded in 2018 and headquartered in Dubai, invygo aims at simplifying the process of getting a car. With the success of our expansion to Saudi Arabia in 2021, we have continued to grow our operations.Being the first car subscription app of its kind in the region, we have a proven track record and an in-depth understanding of our customers' mobility needs.Our app enables customers to own or subscribe to a car on a monthly basis without any hassle. Customers can commit for a minimum of 1 month with our monthly plans or 36 months with our Subscribe to Own service.invygo's car subscription service is different from renting or buying a car. We offer the best of both worlds. Unlike renting, we don't require our customers to make a large deposit upfront. They can also choose the exact car model and features they want through our app, a benefit that rental companies don't offer. Buying a car comes with high up-front and maintenance costs, long-term commitment, registration and insurance charges. With invygo's Subscribe to Own plans, our customers pay an all-inclusive fee monthly without the additional paperwork and cost.At invygo, we empower our customers to access a car with no deposit or down payment, no long-term commitment, and the option to cancel their monthly subscription plans at any time through our seamless digital platform.

About The Role

Our dream engineer has a knack for writing the most performance optimized code along with it being modular and scalable. Mentally, you must have the persistence to continuously

challenge the status quo and embrace change. Culturally, you need to believe that no challenge is too big to solve, and love thinking about products and get excited to ideate and build all by yourself.

What You Will Be DoingYou design, develop and deploy web applications

Maintaining and improving website

Optimizing applications for maximum speed

Collaborate with product owners to understand business requirements and help translate these into technical requirements

We want you to bring your whole self to work and strive to foster an environment that supports your individual growth

Write testable, scalable, and efficient code; lead code reviews

Collaborate with the Design and Back-end teams to build scalable, performant appsRequirements4 years experience working with frontend technologies

In-depth understanding of the entire web development process

You are interested in keeping up with current best practices in your areas of expertise

You care about quality and want to improve processes, both internally and across the company

Based in Dubai, or open to relocating to Dubai in line with the start datePreferred ExperienceOur engineers mostly work with React. Experience with React will be preferred, however we are open to engineers from all backgroundsInterview Process30 minute call with a member of the talent team

Take-home assignment

60 minute interview with Director of Engineering

30 minute culture interview with 2 senior business stakeholdersMore JobsFood & Beverage Hostess Jobs In Dubai 2023 | MövenpickMarketing Specialist Jobs In Dubai UAE | HiltonBike Rider jobs In Dubai | Al Maya Management coWriter Jobs In Dubai UAE 2023 | ShoutVoxSecurity Guard Jobs In Dubai | Al Maya Management coHr Manager Jobs In Dubai | Al Maya Management coMarketing Executive Jobs In Dubai UAE 2023 | CharterHouseRestaurant Manager Jobs In Dubai | Al Maya Management coStart up Exploration Trainee Jobs In Dubai UAE | Chalhoub GroupSenior Executive Jobs In Dubai UAE 2023 | MarriottSenior Manager Jobs In Dubai 2023 | Publicis GroupeDriver for taxi and mini bus Jobs In Dubai | AL MANAJ Group LLCBrand Executive Jobs In Dubai UAE 2023 | Apparel GroupAutoCAD Draftsman Jobs In Dubai | MOHD AL KHATIB COMPUTERS
