

Full Stack Developer (Web)

[Apply Now](#)

Company: Fiverose

Location: united arab emirates

Category: other-general

Experience: Proven experience as a Full Stack Developer with a minimum of 4-6 years in development.

Job Description: We are seeking an experienced Full Stack Developer with a robust skill set in Python, AI, Laravel, Node.js, and their respective frameworks to join our innovative team. As a Full Stack Developer, you will play a pivotal role in designing, developing, and implementing web applications, leveraging your expertise in both front-end and back-end technologies.

Responsibilities:

- A. Front-End Development: Utilize modern front-end frameworks such as React, Angular, or Vue.js for building dynamic user experiences.
- B. Back-End Development: Design and implement server-side logic using Python, Node.js, and Laravel. Integrate applications with databases, third-party APIs, and other backend services.
- AI Integration: Implement and integrate AI and machine learning algorithms into web applications. Collaborate with data scientists to deploy and optimize AI models.
- C. Database Management: Design and maintain databases (e.g., MySQL, MongoDB) to ensure optimal performance and data integrity. Write efficient database queries and manage database schema.
- D. API Development: Create and maintain RESTful APIs using Python (Flask/Django), Node.js (Express), and Laravel for seamless communication between front-end and back-end systems. Collaborate with other teams to integrate external APIs.
- E. Version Control and Deployment: Utilize version control systems such as Git for source code management. Deploy applications using modern deployment tools and practices.
- F. Testing and Debugging: Conduct unit testing, integration testing, and debugging to ensure the reliability and performance of web applications. Identify and resolve bugs or performance bottlenecks.
- G. Deployment with Docker and Jenkins: Create Docker containers for seamless

deployment and scalability of Python applications. Implement continuous integration and continuous deployment (CI/CD) pipelines using Jenkins. Qualifications: Bachelor's degree in Computer Science, Software Engineering, or a related field. Proven experience as a Full Stack Developer with expertise in Python, Node.js, Laravel, and their frameworks (e.g., Django, Flask, Express). Must know how to Design and implement robust, scalable, and efficient Python-based applications. Collaborate with cross-functional teams to develop AI-driven features and functionalities. Strong background knowledge in using frameworks such as Flask or Django for building web applications. Experience integrating AI and machine learning models into web applications. Solid understanding of databases (MySQL, PostgreSQL MongoDB) and database design principles. Familiarity with RESTful API development and integration. Familiarity with Third-Party Integration. Familiarity with the finance industry is a plus. Expertise in deploying applications using Docker and Jenkins. Excellent problem-solving and communication skills.
