As a Full stack Software Engineer at TradeTracker.com, you will play a pivotal role in the development and enhancement of our performance marketing platform. We are passionate about technology and in our development we follow a cloud-native approach, leveraging AWS services, whilst using tools from the Atlassian product suite, and GitLab for our development and deployment processes. In this role, you will have the opportunity to make a significant impact by designing and implementing solutions that drive the success of our platform.

Responsibilities

Domain-Driven Design: Familiarity with Domain-Driven Design (DDD) principles is highly beneficial, as our platform deals with complex domain models

Agile team mindset: Experience working in multidisciplinary scrum teams, actually using the scrum methodology.

Basic Relational Database skills: Experience with adding and adjusting tables as well as writing simple queries.
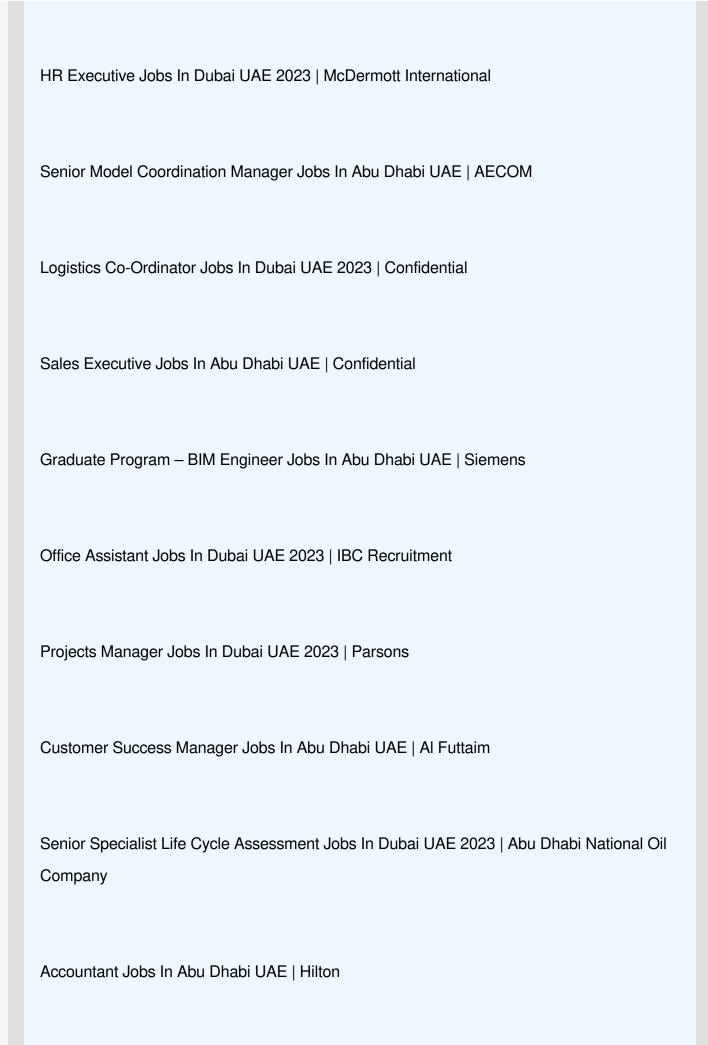

Docker: We use Docker extensively for containerization. Experience with Docker is required.

Apply Also Physiotherapist Jobs in Abu Dhabi | Mediclinic

Requirement

PHP Expertise: You should be well-versed in PHP, with a deep understanding of modern PHP best practices.

Advanced front-end skills: You know all about front-end (html, javascript and css) using Laravel LiveWire and blade templates as well as the Tailwind css framework.

Laravel Framework: Mastery of the Laravel framework is a must. You will be responsible for developing and maintaining critical components of our platform using Laravel.

Apply Architectural Best Practices: We value architectural excellence. You should be skilled in applying best practices to ensure the scalability, reliability, and maintainability of our software.
