What you'll do:

Work with enterprise analytics and data science teams to research, prototype and implement new statistical methodologies that extend the portfolio of insights we can provide to the marketing teams.

Assist in machine learning model development, evaluation and deployment in addition to support segmentation, profiling and attribute derivation.

Leverage cloud data infrastructure to build and integrate the models into real-time services that power the analytical and marketing execution processes.

In collaboration with cross-functional experts across IT, Cybersecurity and the Data Privacy Office, be responsible for understanding and adhering to the current privacy, security and regulatory compliance as it pertains to customer data, contribute to keeping and improving governance best practices and standards.

Maintain compliance to Emirates Group privacy principles. Work with the Data Privacy Network Liaison within CCMB to ensure privacy and security of personal data is considered by design and default in all aspects of the role.
