Company: Michael Page

Location: United Arab Emirates

Category: other-general

The Role

Spearhead a technology revolution in business operations. You will identify initiatives and lead a team building and acquiring cutting-edge software solutions, tools and technologies to optimise every process for a business at the forefront of natural resource production. Client Details An acquisitive UAE based natural resources entity. Description * Create a vision and strategy for transitioning software operating model away from a cost centre to a revenue driver * Develop multiple initiatives for leveraging the latest industry technologies and tools, including Blockchain, AI/ML, VR/AR, automated machinery, and cloud capabilities. * Provide strategic direction and leadership for the entire software development team (in-house and outsourced). * Build partnerships and commercial relationships with technology vendors to support the implementation of software development initiatives. * Design and build software, tools and technologies to improve operations and processes. * Develop and implement a comprehensive software development lifecycle (SDLC) strategy. * Requirements gathering, design, development, testing, deployment, and maintenance. * Manage and allocate resources effectively to meet project deadlines and objectives. * Partner with key stakeholders across the organisation to understand business needs. * Track and report on key performance indicators (KPIs). Job Offer * Opportunity to work with one of the largest entities in the region. * Competitive salary and tax free earnings.

Requirements

* Bachelor's degree in Computer Science, Software Engineering, or a related field (Master's

degree preferred). * Minimum 10+ years of experience in leading and managing enterprise software development teams. * Proven track record of successfully delivering multiple complex software projects on time and within budget. * Proficient in the design and development of enterprise applications. * Strong understanding of Agile methodologies and software development best practices. * Excellent communication, collaboration, and interpersonal skills. * Ability to think strategically and translate business needs into technical solutions. * Experience in building and managing high-performing software development teams. * Fluency in English; knowledge of additional languages is a plus. * Willingness to travel internationally as needed.
