Responsibilities

App Development: Design, develop, and maintain iOS applications using Swift or Objective-C, ensuring the highest quality and performance.

UI/UX Implementation: Collaborate with UI/UX designers to implement user interfaces that are visually appealing and provide an exceptional user experience.

Code Optimization: Write efficient and well-structured code, and continuously optimize the application for performance, responsiveness, and scalability.

Debugging and Testing: Identify and resolve issues and bugs through testing and debugging processes, ensuring the app works smoothly across different iOS devices and versions.

Version Control: Use version control systems like Git to manage and track changes in the source code.

App Store Compliance: Ensure that the iOS app complies with Apple's App Store guidelines and successfully submit and update applications on the App Store.

API Integration: Collaborate with backend developers to integrate RESTful APIs and web services into the app.
