Description:

For our client, a multi-seller E-commerce platform based in Dubai, we are looking for an IT System Administrator to join their rapidly expanding team. This is an exciting full-time, long-term opportunity offering a competitive salary package. If you are passionate about e-commerce and experienced in online merchandising, this job is perfect for you!

Responsibilities:

In this job, you will be an IT Systems Administrator in an AWS environment.

Responsible for managing systems administration, fulfilling complex IT requests and tasks, and maintaining systems availability, performance, and security.

You will also be expected to monitor systems, perform routine audits, apply updates and patches, develop and enforce IT security practices, and take ownership of the entire IT environment.

Additionally, you will work with a mix of AWS-hosted Linux systems and have expertise in managing various technologies such as AWS, Linux, MySQL, and more.

Requirements:

Amazon Web Services (AWS) including EC2 Instances, S3, RDS/Aurora, Route 53, IAM,

load balancing, and cross-region replication.

Linux (Centos 7 & 8, Ubuntu) and Nginx.

MySQL.

AWS Workdocs, Google Workplace.
