Java Developer

Company: Nityo Infotech

Location: United Arab Emirates

Category: computer-and-mathematical

You will be expected to Participate in the design and implementation of proposed solutions. Collaborate with cross-functional teams to analyze, design, and ship new features. Must have a strong programming background authoring well written, well documented, modular and clean code. Must be well organized, a good communicator, able to effectively prioritize tasks, and manage your projects from concept to production. Ability to write Stored Procedures, write complex SQL queries, and ability to analyze the SQL data is desired. Attention to detail and commitment to high quality/error free deliverables. Develop code that complies with design specifications and meets security and Java/JEE best practices. Self-Disciplined, flexible and highly cooperative. Skills & Requirements 3-7 years of work experience in Java, J2EE, UNIX/Linux, PL/SQL, Data Structures, Design Patterns, Optimizations, Object-Oriented design, Shell scripting, algorithm design and analysis. Competent in core Java basics and Multi-threading, Spring MVC, Struts, JPA and, Hibernate etc. Hands on experience in developing message-based architecture and low latency applications. Ability to tune applications performance, memory management, garbage collection. Experience developing and deploying applications in leading application servers such as WebLogic, Tomcat and JBoss. Strong knowledge and working experience in relational database technology: SQL, JDBC, MySQL, Data Structures and Algorithms. Experience with Web Services (JAX-RPC, JAX-WS, JAXB, REST/XML-over-HTTP, SOAP, WSDL). Experience using Test Driven Development, Continuous Integration, Test Automation. Mobile development experience is a plus. Eligibility: // in CS/ IT or equivalent.

Experience Required

5 - 8 Years

Industry Type

IT

Employment Type

Contract

Location

United Arab Emirates

Roles & Responsibilities

You will be expected to Participate in the design and implementation of proposed solutions. Collaborate with cross-functional teams to analyze, design, and ship new features. Must have a strong programming background authoring well written, well documented, modular and clean code.
