Description:

We are looking for a Java Developer with experience in building high-performing, scalable, enterprise-grade applications. You will be part of a talented software team that works on mission-critical applications. Java developer roles and responsibilities include managing Java/Java EE application development while providing expertise in the full software development lifecycle, from concept and design to testing.

Responsibilities: Contribute in all phases of the development lifecycle

Write well designed, testable, efficient code

Ensure designs are in compliance with specifications

Prepare and produce releases of software components

Support continuous improvement by investigating alternatives and technologies and presenting these for architectural review

Requirements: BS/MS degree in Computer Science, Engineering or a related subject

Proven hands-on Software Development experience

Proven working experience in Java development

Hands on experience in designing and developing applications using Java EE platforms

Object Oriented analysis and design using common design patterns.

Profound insight of Java and JEE internals (Classloading, Memory Management, Transaction management etc) #J-18808-Ljbffr
