Land Surveyors (Roads)

Land surveyors (Roads) use special equipment to conduct measurements and evaluations of sites for public, government, and private property. The responsibilities of land surveyors include developing land survey reports and performing calculations of measurements and evaluations.

Duties & Responsibilities: Developing the land surveying strategies.

Conducting land surveys on various properties.

Reading and interpreting drawings and topographic maps.

Measuring distances and angles of the land surface.

Using the required land surveying equipment.

Drawing the rough sketches of the land.

Reading the maps and making notes as per the requirements.

Reporting the legal land description for surveys.

Calculating the measurements of the land site.

Verifying the calculations and analyzing the data.

Maintaining the surveying equipment.

Preparing the reports on survey results.

Presenting the data to clients.

Advising on technical aspects.

Researching the legal boundaries of the site.

Collaborating with the team members.

Guiding the new employees as and when required.

Following all the legal procedures. Key Skills: Bachelor's degree in Civil Engineering, Land Surveying, or a similar field.

Proven work experience working as a Land Surveyor or a similar position.

A valid surveyor's license is required.

Proficiency in land surveying software such as SurveCE, FieldGenius, X-PAD Survey, etc.

Ability to understand and interpret written documents.

Phenomenal understanding and knowledge of GPS and GIS.

Quick decision-making abilities.

Illustrate good time management skills.

Ability to meet deadlines.

Good organizational and interpersonal skills.

Excellent math and analytical skills.

Outstanding oral and written communication skills.

Ability to explain the terminologies and findings to the team members. Vertical -
