Lead Engineer, Engineering (E, I&C)

[Apply Now](#)

Company: Ghobash Group

Location: abu dhabi

Category: other-general

Emirates Electrical & Instrumentation Company LLC is a proud member of the Ghobash Group. For almost 20 years, we have made vital contributions to the Oil & Gas sector of the UAE, executing both onshore and offshore projects. Abu Dhabi National Oil Company (ADNOC) is one of our main clients along with Tier 1 and Tier 2 EPC contractors in this sector. We have the expertise to carry out full EPC&M services for electrical and instrumentation works and bring our intrinsic knowledge to measure and automate exploration, production, separation, refining processes, and distribution through our localized services.

Job Description

Overall responsibilities: Working as multi-discipline Lead on assigned project, specifically for electrical, instrumentation and control systems but not limited to mechanical, piping, and civil / structural. Supervise and monitor the performance of Engineering consultant, review & comment Engineering consultant deliverables, oversee and coordinate with internal team, and client personnel for submission of engineering deliverables, coordinate and resolve technical issues Provide guidance and direction to other multi-disciplinary team members for assigned project. Assure compliance with engineering procedures and quality control & HSE standards. Supporting construction and commissioning activities after completion of engineering and close outs.

Day to day responsibilities: Lead and supervise performance of engineering consultant for all disciplines and pre-dominantly for electrical, instrumentation and control including general execution, management of engineering schedule / key engineering milestones, budget, and engineering progress. Assist project team with establishment of project plans, schedules, and budgets. Participate in site visits as required for site surveying and gathering data and important

information required to engineering team for detailed design. Participate in development of estimates for engineering works and reviews. Interface with various engineering disciplines and suppliers. Prepare Elec, I&C Equipment Specifications, Data Sheets, Purchase Requisitions and Bid evaluations as required. Review Vendor Documents. Participates in project audits (quality and technical). Participate in Hazop, LOPA, and SIL review and assures compliance with project engineering procedures and quality control and HSE standards. Project Execution may include but not limited to: Specifying, selecting and sizing field instrumentation (Pres/Temp/Flow/Level), Control Valves, on/off valves, relief valves and control devices Prepare and review control deliverables such as Control Philosophy, Control Narrative, Cause and Effect diagram, and Control system architecture. Preparing and reviewing I/O lists and assignments Selection and procurement of controls hardware, communications, and network systems Preparing and checking Instrument Loop diagrams as well as System cabinet design / wiring Responsible for performing squad check of vendor data and drawings from other disciplines. Providing input to P&ID's Design, development, and technical content of the Elec, I&C portion of project work Have frequent contact with vendors, and internal staff Plan, coordinate and prepare Material Requisitions, Technical Bid Evaluations, and award recommendations for various equipment with all disciplines. Qualifications Minimum Bachelor Degree in Engineering (Electrical, Instrumentation) with (15 Years minimum) in the Oil & Gas industry. Affinity and familiar with Engineering, Procurement and Contracting aspects in the business, both onshore and offshore. Additional Information Experience Requirements: Experience level: 15 years 10 years or more experience UAE or Middle East Minimum 05 years as Lead Engineer on medium to large scale projects in similar business or industry Familiarity with applicable codes, standards and regulations used in Middle East.
