Lead Operability Engineer Job in Dubai | Chalhoub CareersDescription:

The Lead Operability Engineer has strong organizational skills as well as a deep understanding of enterprise application operations with a strong devops background, whilst specializing in Digital Event Management working alongside Digital Operations teams on a day-to-day basis. Job Responsibilities: Managing respective monitoring and alerting tools across the Digital Technology domain, enabling the automation of all development, quality assurance, and production servers as well as the automation of continuous integration and continuous delivery for our monitoring and alerting platforms.

Driving operational support requirements and implementing them in our monitoring and alerting stacks; working closely with Group Architecture and Engineering teams on devising an enterprise event management roadmap for the Digital Technology domain.

A strong problem solver, who takes initiatives on both process and solution improvements with the Digital Operations Manager and their teams particularly when it comes to Problem Management and solving deep routed issues in the Product stack.

Verifying releases on an operational level such as stability and maintainability/support; focusing on performance operations with the Product teams and QA/Engineering teams.

Requirements: In depth architectural knowledge, focused on monitoring and operation of applications, specifically Digital Technology (eCommerce, CRM, Native Mobile, Integration, Mobile Technology, AWS to name a few).

A minimum of 5 years of working experience in a DevOps capacity, preferably as a DevOps Engineer. Strong experience automating the managing large-scale infrastructure

and have significant familiarity with DevOps tooling such as Puppet.

Strong experience in systems automation, orchestration, deployment, and implementation.

Demonstrable experience in software development and experience working with tools and languages such as SaaS, Git, Python, Shell scripting. #J-18808-Ljbffr
