Lead/Principal Cloud Solution Architect Jobs In Ajman | EPAM Systems

About the job

Are you an industry visionary and technologist at heart with a passion for designing complex Cloud solutions? Are you able to guide and advise business and IT teams on creating new Cloud-native applications and services? Do you have strong soft skills, solid stakeholder management and technology governance experience? Do you want to transform businesses, so they are able to operate and grow successfully in the cloud-first world?

Requirement

Work closely with business in identifying solution requirements and key case-studies/scenarios for the future solution

Enable AWS, Azure or GCP cloud journey, analyse TCO and create a business case, make the Cloud dream become reality

Design and prototype cloud solutions, create solution architecture document covering deep technical aspects of the implementation

Create a unified strategy for cloud transformation governance, automation, security, implementation and operations

Analyse existing application portfolios, develop next-gen application architecture, transformation and modernisation roadmap

Conduct cloud solutions architecture review/audit and create review/audit report

Lead implementation of the solution from establishing project requirements and goals to

solution "go-live"
