

Lead Process Engineer - Offshore

[Apply Now](#)

Company: Wood

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Wood is presently looking to hire **Lead Process Engineers** for our Engineering team in **Abu Dhabi**. Below are more details about the role.

Be able to lead and supervise Process Engineering Teams in Feasibility, Conceptual Studies, Pre - FEED, FEED and EPC Projects

Undertake process design work of units as required, supervise and check works of assigned engineers on the project as appropriate

Execute process engineering activities within the budget and schedule, as well as maintaining technical integrity of the design

Ensure that detail design methods, standards and data used conform with Client's requirements and / or those issued

Be responsible for the checking or approval of basis of design, process calculations, safety related calculations to develop the robust design

Review and approve Process Flow Diagrams, P&IDs, PSFS, DPTDs, Equipment & Instrument specifications, Process Descriptions, cause, and Effect chart etc.

Review and approve dynamic simulation study, transient study, surge study, Minimum Metal Design Temperature (MDMT) study, etc.

Review and approve depressurization studies, flare load estimation and flare system design

Ensure a high standard of safety is achieved and Environmental and Quality Assurance procedures are followed

Review and approve safety related calculations and provide input to HAZOP, SIL and other safety reviews as required

Identifying new methodology of work process required for higher productivity

Contribute where necessary to review of supplier quotations and reviews of the project

Ensure that requirements of Licensor's Secrecy Agreements are known and complied within the work performed

Participate in technical meetings and handle discussions with client engineers

Identification of issues that impede project progress and reporting to Project Managers, Engineering Manager / Discipline heads

As Lead Discipline Engineer, when assigned on projects, responsible for managing the team of engineers, designers, and delivering the engineering requirements of the project

Be willing to mentor and engage in the training and development of junior engineers in the team

Assist project team in the preparation of planning package, scheduling, weekly reporting etc.

Assist as required in the preparation of pre - commissioning, commission procedures and operating Manuals

Provided assistance in Manhours estimation and scheduling for proposals

Bachelor's degree in chemical engineering or equivalent from an accredited university with a minimum of fifteen (15+) years of relevant experience in the Offshore/Onshore Oil & Gas industry, including minimum (5) years (preferred) in GCC region.

Must have at least five (5) years of experience in similar position in a mega Oil & Gas or Petrochemical projects, managing team of Specialists, Senior Engineers and Engineers.

Offshore experience is must, whilst ADNOC experience is desired.

Proficient in Process Simulation software's such as HYSYS, Flare System Analyzer, PipeNet, Pipesim, OLGA etc. and should be a subject matter expert.

Knowledge of engineering computer programs and general business software

Experience of working in a multi - project / multi - disciplined environment and throughout all engineering and design phases of projects

Previous experience of working in the Middle East would be an advantage
