Job Title - Lead Mobile DeveloperLocations - Dubai and Abu Dhabi, UAEAre you ready to explore a world of possibilities?

Do you want to work on innovative projects, collaborate with a dynamic and supportive team, and receive investment in your professional development? At DTCC, we are at the forefront of innovation in the financial markets. We're committed to helping our employees grow and succeed. We believe that you have the skills and drive to make a real impact. We foster a thriving internal community and are committed to creating a workplace that looks like the world that we serve.

The impact you will have in this role:

We're looking for a Senior Flutter Developer (Mobile Developer) to join our Mirai team to help us revolutionize the way mobile applications are built with our innovative server-driven UI framework. The primary objective of this role is to develop cutting-edge features in Mirai. This role not only involves contributing to the Mirai framework but also extends to developing next-generation products like Mirai AI and Mirai Studio, as well as groundbreaking a new FinTech application built with Mirai. You'll closely collaborate with cross-functional teams, including Product Managers, Designers, and other Engineers, to deliver top-notch features and play a meaningful role in crafting the future of application development.

Your Primary Responsibilities:

Design, develop, and maintain high-quality, scalable client applications using Flutter and Dart

for mobile and web platforms.

Lead the development of complex features and functionality for Mirai, contributing to our core framework and growing ecosystem of components.

Design and develop advanced applications utilizing the Mirai framework.

Collaborate closely with product managers, designers, and other developers to translate requirements into elegant and user-friendly applications.

Participate in code reviews, providing constructive feedback and guidance to junior developers.

Write unit and integration tests to ensure code quality and stability.

Contribute to technical documentation and guides, ensuring developers have comprehensive resources to succeed with Mirai.

Be a technical thought leader, advocating for best practices and exploring new possibilities for server-driven UI development.

**NOTE: The Primary Responsibilities of this role are not limited to the details above. **

Talents Needed for Success:

3+ years of experience in mobile application development, ideally with extensive experience in Flutter.

Proven expertise in developing complex and scalable mobile applications with state management, networking, and UI/UX Components

A proven understanding of how the Flutter framework works.

Strong proficiency in the Dart programming language.

Experience with state management solutions like BLoC or Provider.

Familiarity with CI/CD pipelines and automated testing tools.

Proficient in version control systems, such as Git

Excellent problem-solving and analytical skills.

Strong communication and teamwork skills.

A keen eye for UX detail

Additional Qualifications/ Knowledge

Have a good understanding of server-driven UI patterns and frameworks.

Active contributor to open-source projects, preferably in the Flutter community.

Previous experience building packages and plugins in Flutter and Dart.

Strong understanding of UI/UX principles and standard processes.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, sex, gender, gender expression, sexual orientation, age, marital status, veteran status, or disability status. We will ensure that individuals with disabilities are provided reasonable accommodation to participate in the job application or interview process, to perform essential job functions, and to receive other benefits and privileges of employment. Please contact us to request accommodation.
