## Lead Web Engineer Jobs In Ajman | Consensys

### About the job

At ConsenSys we have a vision of a world where data sovereignty and financial well-being is accessible to every person and organization. We believe Ethereum and decentralized protocol technology is a more trustworthy and equitable foundation for how we create and share value across the web. On this trusted, open source foundation, we can accelerate the world's transition to a universally accessible network of distributed participants where transparency, security and freedom are fundamental.

### Requirement

Infura is the leading infrastructure platform providing scalable and easy-to-use APIs and cloud solutions for blockchain and decentralized application developers. Infura currently offers APIs for Ethereum, IPFS, and other leading decentralized networks, allowing developers to immediately begin building instead of spending time on architecting and maintaining their own infrastructure.
