### Linux Engineering Manager Jobs In Dubai | Canonical

#### About the job

Lead an engineering team that partners with the Linux engineers of a major silicon company, and works across the full Linux stack from kernel to GUI, to optimise Ubuntu, the world's most widely used Linux desktop and server, for the latest silicon. The role is a fast-paced, problem-solving role that's challenging yet very exciting. The right candidate must be resourceful, articulate, and able to deliver on a wide variety of solutions across PC and IoT technologies. Our teams partner with specialist engineers from major silicon companies to integrate next-generation features and performance enhancements for upcoming hardware.

**Requirement**You have worked with Linux distributions, debian packaging and high performance, server-class hardware

You have experience working directly with customers, resolving their technical issues, interpreting their business challenges and effectively communicating how your solution will meet their needs

You have demonstrated experience managing or leading a team of software engineers

You have understanding of agile software development methodologies

You collaborate effectively across multiple internal teams, building trust and delivering results

You have effective communications skills in English, both written and oral

You have a bachelor's (or equivalent university level) degree, preferably in a technology

field#J-18808-Ljbffr
