

Maintenance Engineer

[Apply Now](#)

Company: TGT Diagnostics

Location: abu dhabi

Category: other-general

The Maintenance Engineer is responsible for the maintenance of TGT equipment, which includes both preventative and corrective maintenance, enhancing service quality and equipment reliability by improving workflows and optimising maintenance processes. He/she is expected to help minimise downtime and failure rates and maximise equipment productivity. Ensure that TGT equipment is maintained to international regulations & company procedures. Carry out routine scheduled maintenance work and respond to equipment faults. Diagnose failed equipment, identify root cause analysis, and develop reports. Deal with emergencies and unplanned problems related to equipment maintenance and repairs. Ensure that TGT equipment is appropriately managed with the minimum capital outlay and achieves the required quality levels and customer satisfaction. Plan and control all activities related to maintenance, repairs, upgrades, calibrations, and certificate requirements. Maintain the validity of all certificates and documents as per policies and guidelines. Ensure application of asset management and maintenance systems data and accurate, timely data entry and reporting. Identify and capture opportunities for enhancement in equipment maintainability and reliability. Identify and capture improvements in the systems/policies/ procedures for maintenance, operations, service quality and HSE. Participate in technical audits and compliance assessments and follow up on closure of remedial action plans. Contribute to the development of an equipment maintenance strategy that is in line with best international practices and aligned with international practices and policies. Participate in on-the-job / workshop training in maintenance for field engineers, technicians, supervisors, and junior maintenance personnel. Always ensure compliance with

the TGT code of conduct and HSE regulations. (Adhere to all safety regulations). Align with TGT's net zero journey strategy and roadmap, actively reducing environmental impact while promoting social equity and fostering economic viability in all aspects of their operations and decision-making processes. Qualifications / Requirements A bachelor's degree or equivalent from a recognised institute or university in Engineering, preferably in electronics, electromechanics, or instrumentation specialities. 4+ years' experience as an Electronics / Maintenance Engineer or similar. Experience in the oil & gas industry or geophysics / well logging services is preferred. Ability to use professional hand tools and all measurement equipment used in the maintenance lab. Understanding of mechanical and circuit diagrams and basic principles of logging equipment operations. Thorough understanding of maintenance manuals, processes, etc. Excellent communication in English (verbally and in writing) Being able to work under pressure. Being able to work in an international environment. Willingness and ability to travel/relocate.
