Description:

Ensure that all survey equipment and machinery are maintained adequately and there is sufficient operational equipment to meet business requirements. Ensure that pro-active planned maintenance is carried out on survey equipment and machinery to prevent problems occurring during operation or site works.

Job Responsibilities:

Allocate manpower within the survey workshop and for technical support on sites/other locations in order to maximise utilisation and keep overtime within budgeted limits.

Control and allocate the flow of work through the survey workshop to make the best use of staff, equipment and other resources.

Job Requirements:

At least 8 years of hands-on experience in a survey engineering workshop, of which at least 3 years in supervising a small team (3- 6 engineers).
