Manager – IT Compliance – Jumeirah Group & Corporate | Jumeirah Hotels & Resorts

Dubai

The group boasts some of the most prestigious and captivating properties in the world, from the iconic flagship hotel and timeless pinnacle of luxury, Burj Al Arab Jumeirah, and lavish Arabian palaces across Dubai's Madinat Jumeirah, to its contemporary Maldivian island paradise at Olhahali Island and art-inspired dolce vita on the island of Capri.

Whether a modern twist on a British classic in the heart of Knightsbridge at The Carlton Tower Jumeirah, or a futuristic setting at Jumeirah Nanjing, Jumeirah's name is synonymous with service excellence, crafting exceptional experiences for everyone who walks through its doors.

An opportunity has arisen for a Manager – IT Compliance to join Jumeirah Group & Corporate.

The main duties and responsibilities of this role:

Manager – IT Compliance – Jumeirah Group & Corporate | Jumeirah Hotels & Resorts

Dubai | [Apply Now](#)

Lead on the processes surrounding internal and external audits, ensuring seamless coordination and timely response to audit observations, reinforcing our commitment to transparency and accountability.

Maintain a meticulous IT audit log and collaborate closely with the IT team to ensure the availability of necessary progress and evidence, supporting our adherence to best practices and regulatory standards.

Implement and oversee daily, monthly, quarterly, annual, and ad-hoc checks on

applications, systems, and security measures to ensure they meet industry standards, reducing vulnerabilities and enhancing operational excellence.

Oversee and ensure that user access reviews are conducted in strict accordance with company policies, safeguarding against unauthorized access and data breaches.

Guarantee compliance with patch management as part of DH IT Operations team.

Guarantee compliance with data backup management as part of DH IT Operations team.

Restoration/recovery tests to be undertaken on regular intervals.

Develop and evolve user access management standards for applications not covered by global standards, such as HotSOS and SevenRooms, ensuring consistency and security across the board.

Ensure that all deployed hardware complies with hardening standards, protecting against potential security breaches and system vulnerabilities.

Identify opportunities to improve IT processes and advocate for the implementation of automation efficiencies, enhancing operational effectiveness

Proactively monitor and address anti-virus updates and critical warnings, collaborating closely with the D
