Description: Responsible for implementing data management and data governance best practices and maintaining a common catalogue of data points and business terminology in order to support and improve data literacy of stakeholders. Liaise with business teams to advocate the importance of using the available data to make informed business decisions. Act as the bridge between business and technology teams to establish rules for the monitoring, collection, storage, protection and ownership of data, while solving complex data issues. Coordinate the drive to improve the long-term structure & use of data, rather than isolated fixes.

Responsibilities:

- Support the Executive – Data Governance to operationalize the documented data governance policies and procedures
- Gathering, documenting, and reviewing requirements with various business and data owners across the organization. Providing necessary support and inputs in the implementation of / improvement of controls in areas of collection, storage, protection and usage of data, impacting their respective functions
- Identification of areas where existing enterprise-level policies and procedures require change or where new ones need to be developed to ensure Data Governance objectives are met
- Partnering with project teams to integrate governance practices as part of a project lifecycle

- Perform regular compliance audits specific to the implemented controls and submit detailed audit reports to the Executive – Data Governance for review and action. Conducting sessions with owners of individual audit findings to discuss the root cause and agree on remediation steps

Requirements: Minimum 8-10 years post qualification experience preferably in banking industry. Functional understanding of data management and data quality practices. Prior experience of working in projects related to improvement of data quality, especially in customer centric applications, and enhancement of linked processes and systems would be an added advantage.

Knowledge, Skills and Attributes (Required)

Good understanding of business architectures related to customer applications (including key internal business processes and application interactions)

Strong MS Excel, MS PowerPoint skills#J-18808-Ljbffr
