We are looking to hire a talented mechanical design engineer. In this role, you will be required to meet with clients to determine their design requirements, plan and execute the design of mechanical devices, develop and test prototypes, and work closely with the manufacturing teams to ensure that design specifications are met.

Responsibilities:

Meeting with clients and design teams to determine mechanical applications and requirements.

Conducting research to inform the design and engineering methods required for the mechanical systems.

Planning and executing mechanical designs using CAD, CAM, and 3D CAD programs.

Performing computer simulations and experiments to virtually test and refine the designs.

Overseeing the development and manufacturing of physical prototypes for testing.

Requirements:

Bachelor's degree in mechanical engineering.

A minimum of 2 years of experience as a mechanical design engineer.

PE certification is advantageous.

Proficiency with engineering design programs such as AutoCAD, Solidworks, and Rhino.
Sound knowledge of design and engineering principles and best practices.
