

Mechanical QC Engineer (Welding)

[Apply Now](#)

Company: Archirodon Construction

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Job Description

We are constantly growing and are currently looking for a **Mechanical QC Engineer (Welding)** to join a top qualified and knowledgeable quality controls team in one of our projects in Abu Dhabi, UAE.

Would you like to be part of a dynamic EPC leader with global presence? We'd like to meet you. Join our worldwide journey. Build on something that matters!

What you will need to do:

Assists in the preparation of quality documentation, including the Inspection & Test Plans (ITPs) and in the review of construction documents for compliance with project quality requirements related to Welding works.

Monitors all phases and processes required for the effective completion of all related Welding works and in particular issues of design, procurement, construction and final hand over of the related Welding works.

Monitors the implementation of Method Statements, and, Inspection & Test Plans related to Welding works, and ensure all necessary records are generated in a timely manner in their area of assigned responsibility.

Manages the inspection and testing of Welding works in their area of assigned responsibilities, including monitoring the work of QC Inspectors under their authority.

Monitors the close out of punch lists established for incomplete related to Mechanical

works.

Monitors all measurement & testing instruments employed for Welding works, that they are functional and calibrated.

Witnesses, reviews and approves welder qualifications and WPS, PQR qualifications.

Liaises and coordinates with 3rd Party Testing /Inspection Company as required related to Mechanical works.

Statistical analysis and evaluation of test data related to Welding works.

Prepares, files, maintains test/inspection records and any other quality records generated related to Welding works.

Assisting construction personnel to identify and resolve problems and potential or actual non-conformances related to Welding works.

Advises the QC Manager of non-conformance occurrences and where necessary, raises a Non-conformance Report for non-compliant work, and monitors the closeout and effectiveness of the correction and corrective action undertaken.

Where required, assists the QC Manager in undertaking periodic audits, including those of sub-contractors and suppliers, in particular technical compliance audits in their field of specialization.

Attends and witnesses all Client verification of work (inspection, test and the like) on site, and coordinates close out of any and all outstanding issues related to Civil works.

Where required, assists in the preparation of final document for certification.

What you will need to have:

Bachelor's degree in Mechanical / Metallurgy / Welding Technology

at least 12 years of related experience (ADNOC experience will be an advantage).

IWE / IWT International Welding Engineer /Technologist or Equivalent Certification

Knowledgeable in Welding Process, Welding Procedure Qualification in line with

ASME SEC IX, AWS D1.1, API 1104, ISO 13847 , SHELL DEP , ADNOC specifications . Familiar with Welding defect identification and root causes with control measures to prevent occurrence , hands on welding training for implementation contractor and vendor welding teams , well versed in monitoring of welding repair data and welder performance . Shall be conversant with resolution of site welding issues including selection of welding consumable based on various material groupings . Ability to optimize welding procedure qualification based on material standard and production thickness

O&G Projects experience.

You are someone who:

Good communication skills

Is able to work both independently, exercising professional judgment and coordination skills

Has excellent organizational skills

What's in it for you:

Expat package is on the shelf, yet the real joy comes from being a member of smart and passionate teams, within an international leading EPC Group on a mission that matters. We create mega construction projects - literally around the globe - with meaningful impact on the local communities for the years to come. At Archirodon, you will find a proud, productive and human-centric culture, caring for and building on our people and their development!

Please note that you will be contacted only in case you are shortlisted for an interview. In the meantime, do not hesitate to stay in touch and keep monitoring our and our page! Rest assured that your application will be treated with strict confidentiality and under all applicable data privacy regulations.
