About the job NetSuite Functional Consultant  
JOB SUMMARY: Responsible for Managing and implementing full project life cycle and providing support for NetSuite to clients. Bring deep business process knowledge to identify and analyze clients business requirements, design and propose solutions and provide post go-live support. Ensure seamless transition through customer lifecycle working closely with external and internal stakeholders.  
KEY RESULTS AREAS (RESPONSIBILITIES): Leverage extensive experience of NetSuite to implement end to end project deliveries (Preferably International experience). Evaluate customers business requirements, needs and objectives and transform same to company processes, solutions and modules being implemented. Document requirements and translate into proper system requirements using high-maturity methods, processes, and tools. Support multiple clients concurrently with aggressive timelines to achieve objectives including client satisfaction and implementation profitability. Lead design activities defining requirements, testing and provide direction to customers and junior consultants. Customize and configure solutions to customer requirements including integration. Define and prepare Functional Specification Documents. Provide functional expertise to support the development of customizations, integrations, reports and data migration scripts. Lead testing activities and test requirements for each phase of the project lifecycle. Support change management activities and advising on potential benefits. Troubleshoot issues that arise during configuration sessions. Provide support and knowledge transfer to functional and technical staff, internal and external stakeholders in the support and use of new or existing systems. Primary point of reference for questions, suggestions and complaints for change

configuration Ensure appropriate levels of product training is provided and user manuals are shared with clients. Provide on-going post go-live support to optimize user adoption Take ownership of tasks and complete the tasks within the deadline Identify and implement best Practices, standards and regulations Participate in the project progress meetings and proactively identify risk areas Perform independent analysis of client situations and challenges, without requiring detailed direction Form conclusions, strategies and recommendations that help our clients make informed decisions Provide direction to junior team members on projects Assist management in defining the overall project tasks and workplan With guidance of firm leadership, identify and pitch new business development opportunities for existing clients

**EDUCATION** Bachelors degree in Computer Science, IT, Engineering or related field NetSuite certifications are mandatory

**WORK EXPERIENCE** At least 4 years of experience in NetSuite implementation Strong business process skills in the following Finance, Warehouse management, procure-to-pay, Lead-to-cash, Project Management, Finance and inventory

**SPECIFIC SKILLS** Demonstrate knowledge and interest in the latest NetSuite updates and best Practices Ability to take ownership of tasks and complete the tasks within given deadline Ability to work independently and be a self learner Strong verbal and written communication skills Well-developed interpersonal skills Strong conceptual, analytical and problem-solving skills Detail oriented, able to multitask and meet deadlines Ability to work well in a team environment.
