

## Neurophysiology Technologist

[Apply Now](#)

Company: Life Medical Equipment LLC

Location: Abu Dhabi

Category: healthcare-practitioners-and-technical

### Company Description

We are looking for an Intraoperative Monitoring Technologist to join our prestigious team at Life Medical Equipment ! The Intraoperative Monitoring Technologist performs neurophysiological monitoring in the operating room to assist with evaluating the functional integrity of the peripheral and/or central nervous system. The types of testing involved can include, but are not limited to, evoked potentials (EP), spine and cranial electromyography (EMG), electroencephalography (EEG), brain mapping, and more! We offer the opportunity to be a part of a growing IONM team with a competitive salary and work-life balance. Our mission is to improve health.

### Role Description

This is a full-time on-site Neurophysiology Technologist role at Life Medical Equipment in Abu Dhabi. The Neurophysiology Technologist will be responsible for carrying out routine and specialized neurophysiological tests, monitoring patient care during procedures, recording and analyzing data, and performing related duties.

### Responsibilities

Strong communication and interpersonal skills

Bachelor's degree in Neurophysiology or related field

Experience with electroencephalogram (EEG), nerve conduction studies (NCS), and evoked potentials (EP) is a plus

- Set up neuromonitoring equipment properly in the OR following biomedical safety standards.
- Calibrate, evaluate, and adjust equipment.
- Optimize recording and stimulation parameters to acquire salient data.

### **Intraoperative Monitoring**

- Interact with the surgical team to provide timely information about the patient's neurologic status.
- Understand the medical and pharmacologic/ anesthetic conditions that influence the various.

### **Education Requirements**

- Bachelor's degree in relevant field or graduation from an accredited Neurophysiology program.

### **IONM test modalities.**

- Understand the clinical correlations between abnormal IONM recordings, various disease states, and injury to the nervous system.

### **Documentation**

- Properly display recorded waveforms of nervous system activity.
- Mark, measure, and calculate information such as neural signal latencies, amplitudes, and conduction times following established guidelines and protocols.

### **Professional Experience Requirements**

- Two (2) years of Neurodiagnostic experience.

### **The successful candidate**

The successful candidate must bring a high level of ethical, intellectual, professional, and personal values that complement the team and company vision. The following competencies are highly valued:

- Focused on clinical quality and delivering the absolute best results for patients.
- Excellent communication skills and basic computer skills are essential.
- Ability to adapt and thrive in a high stress environment necessary.
- Proven self-starter who works well independently and as a part of the OR team.
