NFT Tester Jobs In Abu Dhabi | Callsign

About the job

Russian hacker, Vladimir Leonidovitch Levin, attempted the biggest bank heist the world had ever seen via dial-up internet in 1994, Zia Hayat, Callsign CEO and founder, was hooked – armchair fraud became a real possibility. From this moment, Zia knew he wanted to play a part in stopping the bad guys and securing the internet for all. Founded In 2012, Callsign's mission has been to make Digital Identity simple and secure for everyone and everything. In that time, we've grown to over 200 employees, opened offices in Singapore and Abu Dhabi, been recognised as a WEF Global Innovator and our technology is being used by many of the world's leading financial institutions to keep millions of consumers safe.But we aren't stopping here. The identity revolution has only just begun, and we are looking to hire the brightest and inquisitive minds to help us make every web, mobile and physical Interaction seamless and secure. If this sounds like you, lets chat.We are looking for a Senior Lead – Performance QA Engineer. You are vital in driving the strategy and execution ensuring that as we evolve our products, we are improving our performance and stability, and highlighting when performance degrades. You will be the SME for the Performance QA domain across the application estate. Responsible for line managing performance and security QA engineers. Manage and deliver end to end performance testing activities. Determining scripting and undertaking performance testing (Load, Stress and Soak) against a suite of asset management web applications.What You'll Do – Establish NFT strategy and approach for the company

Work with teams to help plan performance testing scope for individual deliverables

Work with the team to ensure performance and scalability are understood and met

Hands-on in producing Performance Test scripts, scenarios in accordance with the documented approach
