Node JS Developer

[Apply Now](#)

Company: Tecbrix

Location: dubai

Category: other-general

We are seeking an experienced Node.js Developer to join our team. As a Node.js Developer, you will be responsible for designing, developing, and maintaining web applications using Node.js and related frameworks. You should have a strong understanding of web technologies, including single-page web applications, web components, and component libraries. Experience with microservices and API services, as well as cloud technologies such as AWS, Kubernetes, and Docker, is also required.

Responsibilities: Designing, developing, and maintaining web applications using Node.js. Creating single-page web applications and implementing web components. Handling component libraries and ensuring their proper integration into applications. Developing microservices and API services using REST and SOAP protocols. Utilizing cloud technologies, such as AWS, Kubernetes, and Docker, to deploy and manage applications. Collaborating with cross-functional teams to define and implement technical requirements. Participating in an agile project setting, including sprint planning, daily stand-ups, and retrospectives. Writing clean and maintainable code with proper documentation. Conducting code reviews and providing constructive feedback to team members. Troubleshooting and resolving technical issues that arise during development or in production environments. Staying up-to-date with industry trends and advancements in web development. Communicating effectively in English, both written and verbal. Possessing professional basic knowledge from the insurance sector (preferred).

Requirements: Bachelor's degree in Computer Science, Engineering, or a related field. Minimum of 3 years of professional experience as a Node.js Developer. Strong proficiency in Node.js and related frameworks (such as Express.js, Koa.js, or

Hapi.js). Experience with single-page web applications and web component development. Familiarity with component libraries and their integration into applications. Proficiency in developing microservices and API services using REST and SOAP. Knowledge of cloud technologies, specifically AWS, Kubernetes, and Docker. Experience working in an agile project setting and using related tools (e.g., Jira, Scrum, Kanban). Good command of the English language, both written and spoken. Basic knowledge of the insurance sector is a plus. Strong problem-solving and troubleshooting skills. Excellent collaboration and communication abilities. Ability to work independently and meet project deadlines. Your email address will not be published. Required fields are marked *
