Category: other-general

Our Rating for the course : 4.8 Stars Based on 45 users

OHSAS 18001 is Occupation Health and Safety Assessment Series-a UK based management system for occupational health and safety. It is intended to help organizations to control occupational health and safety risks. It was developed in response to widespread demand for a recognized standard against which to be certified and assessed. OHSAS 18001 has been developed to be compatible with the ISO 9001 (Quality) and ISO 14001 (Environmental) management systems standards, in order to facilitate the integration of quality, environmental and occupational health and safety management systems by organizations, should they wish to do so. The Lead Auditor for OHSAS 18001:2008 is a competency-based 5-day course that teaches the principles and practices of effective Occupational Health and Safety Assessment Series (OHSAS) process audits in accordance with this standard. The students are guided through the entire audit process, from managing an audit program to reporting on audit results. The course uses effective methods of learning through a formal classroom tutorial, practical role-playing, group workshops, and open forum discussions. OHSAS 18001:2007 has been withdrawn and replaced by ISO 45001:2018
